<sup>\*</sup>Note 2: "Manufacture" refers to the final assembly of components into the building product that is furnished and installed by tradesmen. For example, if the hardware comes from Dallas, TX; the lumber from Keene, NH; and the joist is assembled in Syracuse, NY; then the location of Manufacture is Syracuse, NY.

<sup>\*</sup>Note 3: Examples of supporting document types include "Cut sheet," "Letter from manufacturer," or "Product literature."

<sup>\*</sup>Note 4: This information to be provided for any product manufactured (See Note 2) within 500 miles of jobsite.

<sup>\*</sup>Note 5: % Weight = (Weight of Component / Weight of Product) 100
