

EASY-TO-USE COLORS FOR UNCOMPROMISING SPECIFIERS

SGS Concentrated Mortar Colors have set the architectural and masonry standard for decades. Our innovative formulas, consistent coloring and depth of color choices enhance the beauty and value of brick, stone, and colored concrete block.

All mortar colors are shipped in proportioned packages which have been accurately pre-weighed and measured, making work at the job site faster and easier. Each individual package is designated as one (1) color unit. It doesn't get much easier.

The mortar colors shown are achieved by the addition of one color unit to one bag of prepared masonry cement or weight equivalent of Portland and lime mortars. Shade variations can occur due to printing limitations, difference in local cements, sand, mix design and workmanship. (See table on back cover.)

MORTAR WITHOUT COLOR

WITH SGS #45A MORTAR COLOR

Color chips on these pages represent shades of "A," "H," and "X" Series SGS Concentrated Mortar Colors obtained when used with light gray masonry cement and light tan builder's sand.

*It is recommended that mortar colored with 97A, H & X pigment be either sealed as soon as possible after curing or be used indoors.
